

## ADDITIONS TO NEW JERSEY STATE LIST OF COLEOPTERA

BY BORYS MALKIN

This list contains ninety-eight species of beetles which heretofore, have not been recorded from the state of New Jersey. The species presented are only such as have come to my attention and no attempt has been made to compile a complete list of additions which have been recorded elsewhere from the state. However I have gone through all available literature to avoid, as far as possible, any repetitions of records. The New Jersey List is much in need of revision, therefore bringing together all additions, corrections, etc., would mean a work several times the size of this paper.

Each locality record is followed by the collector's name in italics. If no such a name appears it may be assumed that the author was the collector. The names of the taxonomists are presented by abbreviations in parentheses as follows: C. A. Frost—(CAF), H. B. Leech—(HBL), R. E. Blackwelder—(REB), J. W. Green—(JWG), C. T. Parsons—(CTP), F. W. Nunenmacher—(FWN), F. T. Scott—(F'TS), O. L. Cartwright—(OLC), L. Lacey—(LL), B. E. White—(BEW), L. L. Buchanan—(LLB), and B. Malkin—(M).
